PROFILE

I automate what repeats and investigate what doesn't add up. Data analyst in audit analytics with an M.Sc. in Big Data Analytics. I build Python automation, Power BI reporting and SQL investigations that end in a decision rather than a chart.

EXPERIENCE

Senior Executive

Jul 2025 – Present

KKC & Associates LLP · Pune, India

- Automated ITGC testing and data extraction with Python, **cutting manual effort 40%**.
- Built an **on-premises NLP tool** that summarises audit and policy documents without any data leaving the firm, reducing review effort **50%**.
- Automated GST R1 and 3B reconciliation in a Streamlit application handling **100+ reconciliations per cycle** with validation and mismatch reporting.
- Designed partner-level Power BI dashboards on billing, utilisation and project health, secured with **row-level security** and year-over-year cost comparison in DAX.

Data Analyst Intern

Jan 2025 – Jun 2025

KKC & Associates LLP · Mumbai, India

- Delivered analytics on financial performance, partner utilisation, billing and project tracking using **SQL, Power BI, Excel and CaseWare IDEA**.

SELECTED PROJECTS

Quick-Commerce Gap & Customer Experience Analysis

2026

Independent · github.com/chaits1412/Quick-commerce-analytics

- Generated and investigated a **150,000-search / 78,936-order** dataset end to end — Python cleaning, **26 documented BigQuery queries**, Power BI diagnosis.
- Found **54.28% of searches ended with no product available** — demand was lost before delivery, not during it. Traced one store's 6.13% on-time rate through four hypotheses, eliminated all four, and reported it unresolved rather than guessing.

Customer Segmentation using RFM and K-Means

2024–25

M.Sc. research project · St. Xavier's College, Mumbai

- Segmented retail customers on log-transformed RFM features; selected **K = 3** by elbow method and cross-read it against a rule-based RFM quintile score, documenting where the spherical-cluster assumption fails.

Churn Prediction & Time-Series Forecasting

2024

M.Sc. coursework · github.com/chaits1412/data-analytics-mini-projects

- Benchmarked five classifiers on 10,000 bank customers — random forest best at **0.94 ROC-AUC**; Age the dominant predictor over every financial attribute.
- Compared SARIMA, Holt's Winter, LSTM and Prophet on five years of ETH-USD prices; **LSTM cut RMSE roughly 7.6x** against the best classical model.

TECHNICAL SKILLS

Languages & Data Python (pandas, NumPy, scikit-learn, XGBoost, TensorFlow), R, SQL, Google BigQuery

Analytics & BI Power BI, DAX, Row Level Security, Tableau, Advanced Excel, data modelling, query optimisation

Automation & Audit Streamlit, NLP, generative AI and prompt engineering, CaseWare IDEA, ITGC, ITAC, Power Automate

EDUCATION & CERTIFICATION

M.Sc. Big Data Analytics — CGPA 9.35/10

Aug 2023 – Jun 2025

St. Xavier's College, Mumbai (Autonomous)

B.Sc. Mathematics — CGPA 9.25/10

Jun 2020 – Jun 2023

B. N. Bandedkar College

Generative AI SQL Database Specialist, Vanderbilt University (Coursera)

Jul 2026

Machine Learning, Great Learning Academy · **Introduction to Cloud Computing**, SimpliLearn

2023 – 2024
